

# BU For Biodiversity

Bournemouth University

**Biodome**  
Where Biodiversity research happens

**Bat and Bird boxes**  
Active during spring and summer

**Bird feeders**  
See great tits, blue tits, robins and goldfinches from October-May

**Herb planters**  
Providing edible herbs like bay and mint for us and flowers for our pollinators.

**Solitary bee boxes— SERT**  
Making a homes for our solitary bee species on campus. May-Sept

**Wild flower planting**  
Native wildflower planting especially designed to help our native pollinators during the summer

**Orchard and Pollinator planting**  
Fruit trees and heathers that blossom in early spring with fruit trees producing fruit into the autumn

**Bulb planting—SERT**  
Look out for daffodils, tulips and bluebells providing much needed colour for us and food for pollinators early in the spring.
