

# Connected Everything Conference 2018

## “Manufacturing a Brave New World”

### CALL FOR POSTER ABSTRACTS

Funded through the EPSRC Manufacturing the Future challenge theme, Connected Everything: Industrial Systems in the Digital Age aims to identify the key challenges we face as digital technologies transform our industrial systems and to highlight related research excellence. It is creating and supporting new collaborations between academics from diverse discipline areas to address these challenges. It provides a forum for discussion and knowledge exchange, as well as funding for risky early-stage research projects in partnership with industry.

Following the success of our inaugural 2017 Conference held at the University of Glasgow, we are delighted to announce that this year's conference will be held at **Newcastle University** on **Tuesday 26 and Wednesday 27 June 2018**.

The Conference Organising Committee is delighted to invite submission of abstracts for poster presentations. Submissions should be made via <https://easychair.org/conferences/?conf=connectedeverything2018>.

#### Key conference themes

- ⇒ Industrial Internet of Things
- ⇒ Data Analytics and Decision Making
- ⇒ The Future Industrial Worker
- ⇒ Design for Future Manufacturing
- ⇒ Cyber-Physical Systems
- ⇒ Service Design and Customisation

Whilst these can be used as a guide, this is not an exclusive list and interesting contributions from other related areas are also be welcomed.
